

Remote Sensing Days

16-17 May, 2018

Call for Abstracts

The Finnish Remote Sensing Days 2018 will be arranged as an intensive two-day event at the Finnish Meteorological Institute in Helsinki. This year we are focusing and welcoming abstracts on topics including new Earth Observation applications and opportunities, changing climate and environment, applications related to energy, bio-economy, smart cities, novel algorithms and applications of big data/AI/machine learning as well as future trends in Earth Observation. All EO applications are welcome!

Do not miss the extended interactive science sessions, panel discussion, networking and social program till the evening. We invite everybody to submit a short (one page) abstract for review by 29th March, 2018. Language of abstracts is English. Please, for submission format, consult the event's web page at:
